

Store Manager for osCommerce

Price: \$149.00

Product description:

Store Manager for osCommerce is a Windows application to quickly and effectively manage your osCommerce online store.

- You can **manage osCommerce products, osCommerce product attributes**, categories, manufacturers, orders and other things.

- You can **export osCommerce products into Excel** file, edit it and then **import products into osCommerce** store - batch updates are so fast now!

- **Import products into osCommerce** from your supplier

osCommerce product import is one of the prominent features, **import from Excel/CSV into osCommerce** in seconds

- You can update your store product quantities, prices and other data using file from your supplier - just **import that file into osCommerce!**

- **Ultimate osCommerce product attribute management** allows you to quickly add, remove and edit product attributes in a matter of seconds with few mouse clicks.

- Simple category tree with **Drag Drop supported** - quickly find and rearrange products in categories using your mouse.

- **Easy populate feature** - using simple clipboard copy/paste **osCommerce product attribute** can be copied to multiple products in few seconds.

- You can create your own **osCommerce Custom Reports** - it's easy, just some basic SQL skills required

- **Quick product search**, advanced filters, order notifications, support for native characters (Japanese, Arabic etc.) and many other usefull features.

All this from your desktop computer - save your time, do not waste it with all that routine tasks!

MagneticOne Store Manager for osCommerce was made for ordinary users not for computer specialists, only few settings required for program to start and it just works.

For MAC Users:

Store Manager requires a PC Emulator to run on a MAC

Please note that this does reduce the performance of the Store Manager software

Compatible PC Emulator (Virtual PC is one we recommend; you can get more information at:

<http://www.microsoft.com/windows/products/winfamily/virtualpc/default.msp>)

We recommend to check [this page](#) to get more information on how to run Windows on a Mac system

For Linux Users:

For Linux users **we recommend** VirtualBox and Windows installation; you can get more information at: <http://www.virtualbox.org>

Please note that this does reduce the performance of the Store Manager software
